

NHHS MODEL UN

Dear Colleagues,

November 25, 2025

North Hagerstown High is excited to host TriMUN III on January 31st 2026.

Each spring our leadership board chooses a Sustainable Development Goal to focus on for the next year. This year we are focusing on water—something so fundamental in our daily lives, yet threatened by climate change, pollution and trash. As a team, our club meetings, training conference and service projects have revolved around ways that we can positively impact our nearby waterways.

Our TriMUN III committees this year are related to water, pulling inspiration from Sustainable Development Goals 6, 13 and 14. It is our sincere desire that as your team members explore these themes they will be motivated to consider both how they use water and how people around the world have access to clean water and how we can support healthy ecosystems in the face of climate change.

- SDG 6: Ensure availability and sustainable management of water and sanitation for all
- SDG 13: Take urgent action to combat climate change and its impacts
- SDG 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development

We have committees in three languages and both heritage students and advanced language learners are encouraged to step out of their comfort zone to address problems facing their countries.

Our team looks forward to hosting your students as we embark on this journey together.

Sincerely,

Angela C. Akamine
